

Large Project with Open-RMF

Modelling the ESTCE building

Exercise

Improve the ROS package that you created in the first project with a new Open-RMF world, including one or several fleets of robots.

Refer to the TFG for hints about the creation of a large model (chapter 6).

Refer to the [RMF_demos_packages](#) for building the models, and creating all the necessary launch files.

Tasks in the ESTCE model

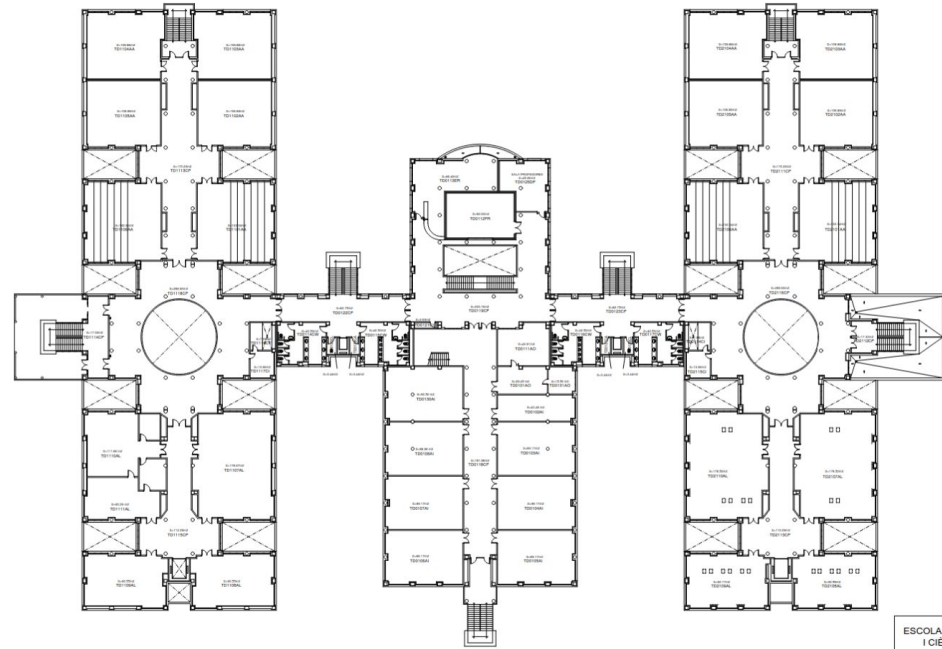

Download the model from [here](#).

Create lanes for several fleets of robots.

Add two more elevators.

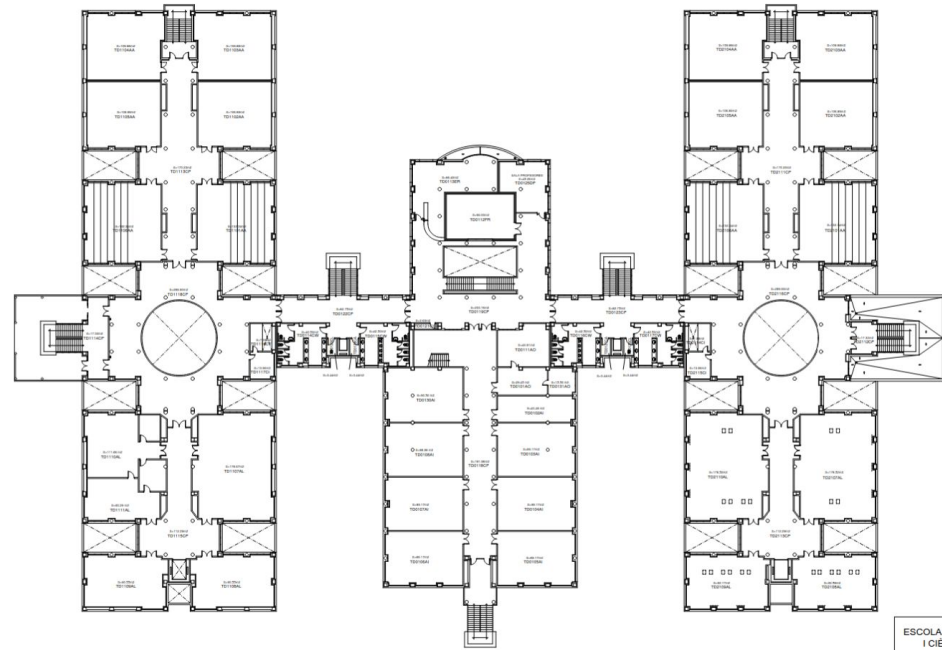

Define and test the following tasks:

- Patrol
- Cleaning
- Delivery

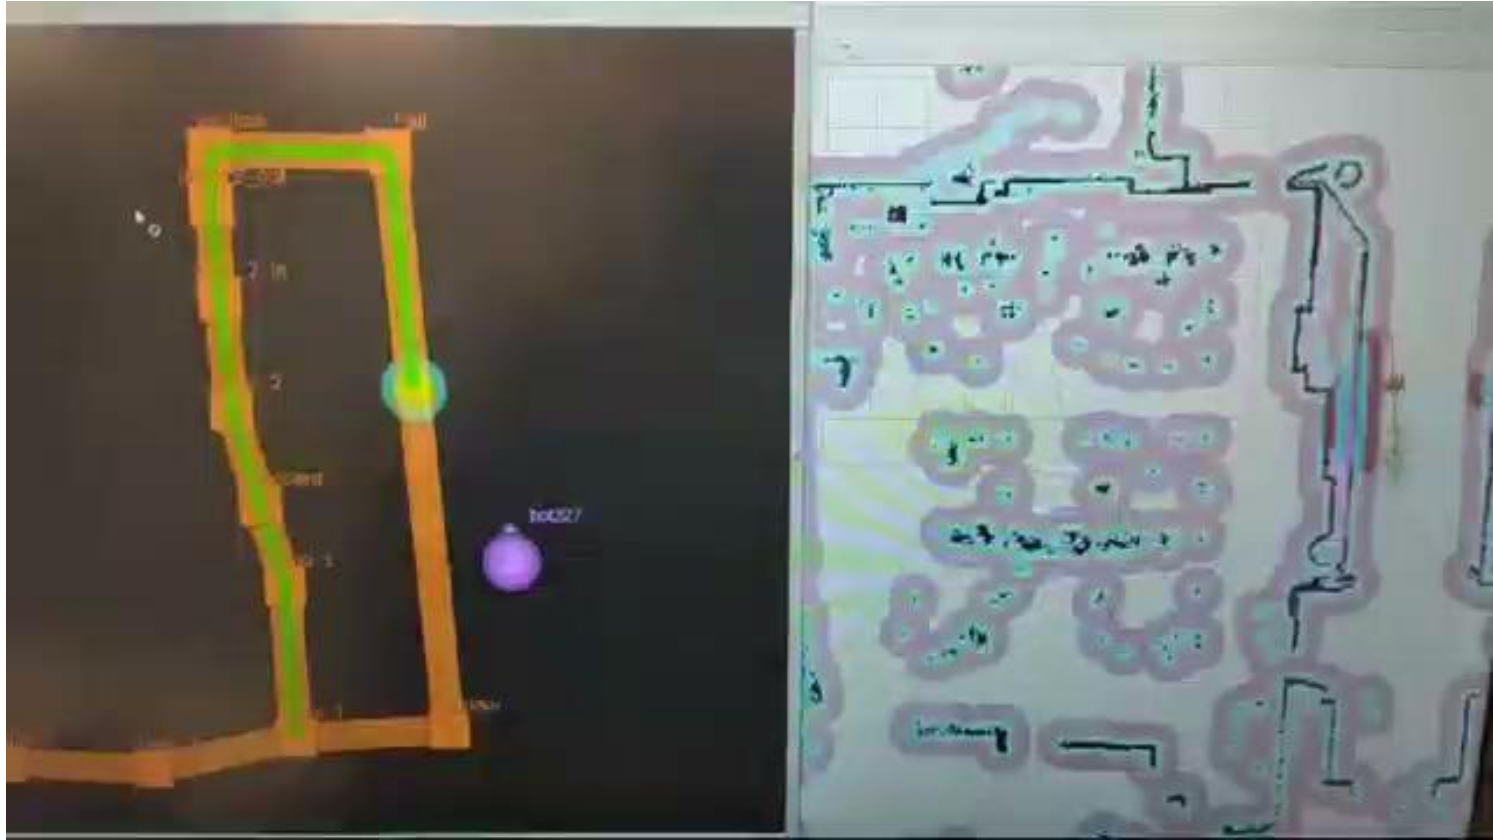

TurtleBots in the ESTCE model

- Create a new version of the model replacing the fleets of robots with TurtleBots
- Use the [Free Fleet Adapter](#)

Real TurtleBots in the ESTCE with Open-RMF

Replace the
simulated robots
with the real
TurtleBots running
Open-RMF

Real TurtleBots in the ESTCE with Open-RMF

- Replace the simulated robots with the real TurtleBots running Open-RMF
